Experience

 **Principal**
Ramboll
Sep 2004 – Present • 14 yrs 6 mos
Chicago, Illinois

Victor Magar is a Principal at Ramboll, with expertise in risk management, contaminated sediment management, contaminant fate and transport, and technology evaluation, testing and selection. His technical expertise includes site characterization; development of in situ and ex situ remediation strategies and processes for contaminated sediment; fingerprinting; fate and transport of bioaccumulative organic pollutants (POPs), such as dioxins/furans, PCBs, polynuclear aromatic hydrocarbons (PAHs), and pesticides; fate and transport of metals; and laboratory and field treatability studies. As a Practice Network Leader for the Ecology and Sediment practice, he serves as a lead civil/environmental engineer for sediment remediation projects, responsible for managing client services in contaminant assessment, monitoring, and remedy selection and implementation. He has considerable experience in monitored natural recovery (MNR); use of reactive amendments, capping, and other in situ technologies; in situ sediment stabilization (ISS); and restoration of floodplains and wetland environments. Victor also serves as an associate editor for ASCE's Journal of Environmental Engineering. [See less](#)
